

'IPDFA PolePro Instructor Courses are The Most Comprehensive Instructor Courses in our Industry.'

Students will qualify with an Internationally Recognised Certification. Accredited & Endorsed by leaders within the aerial and fitness Industry, on 6 continents. Each student is mentored by a Master trainer who serves as their personal tutor for the duration of their course.

PolePro Instructor Courses are scientifically & structurally designed to ensure that our industry has qualified instructors who have an advanced knowledge on how the mechanics of the human body work, together with the laws of physics that will influence a student's ability to progress safely.

PolePro Instructor Courses focus on all preparative & conditioning skills so that their students are given personalised conditioning programs and are all able to set realistic goals whilst continuing to develop their skills under the watchful eye of an instructor that cares about the development of all their students.

As an IPDFA PolePro Instructor your ethos becomes safety and conditioning, all instructors will be versed on how to strap their students for any injury sustained on their level of teaching through an International affiliation between Rocktape & PolePro.

The reputation that precedes your certification, gives studio owners peace of mind in hiring an IPDFA PolePro Instructor knowing their instructors know how to spot & teach correctly and safely, handle big groups of students, design a full class plan for mixed level students, this allows studio owners to add their personal studio style to any qualified instructor applying for a job in a professionally managed studio.

Opportunities to work for the IPDFA earning money, doing what you love, join our Team of PolePro Master Trainers working to qualify instructors and maintain an industry safety standard.

Beginner, Intermediate, Advanced, Master Level Courses Available live or online.
